

SOLUTIONS OVERVIEW

Secure Your ServiceNow Platform with AppOmni

ServiceNow's workflow-based IT platform has enabled companies to centralize their business, operations, and service management technologies. Through this consolidation, companies are realizing benefits ranging from increased efficiency to improved customer service and productivity. Yet these benefits also come with potential risk to an organization's security posture.

Effectively managing the ServiceNow platform requires staying up-to-date on the latest releases and functionality, and ensuring that the proper security measures and processes are in place.

AppOmni provides centralized visibility and reveals the current security posture of your company's ServiceNow platform.

With AppOmni's continuous monitoring and detection, security teams can:

- Quickly discover platform security configuration gaps
- Ensure alignment to security baseline best practices
- Get timely notifications of configuration drift
- Be informed of suspicious activity or user actions that require immediate attention

SOLUTION BENEFITS

- Increase awareness with centralized risk visibility for ServiceNow and other business critical apps
- Discover key ServiceNow platform security configuration risks and gaps
- Decrease administration time by leveraging AppOmni's ServiceNow best practice security policies
- Reduce risk with 100+ ServiceNow platform security configurations
- Receive high-fidelity detection alerts specific to ServiceNow activity and actions

AppOmni provides enterprises with the tools needed to work more efficiently and maintain a higher level of SaaS security in their ServiceNow environments and throughout their enterprise ecosystems. Centralized visibility helps organizations quickly uncover misconfigurations and data access risks wherever they exist. With AppOmni, security, admin, and development teams are more proficient in managing ServiceNow and other SaaS platforms.
