

# Prevent SaaS Breaches

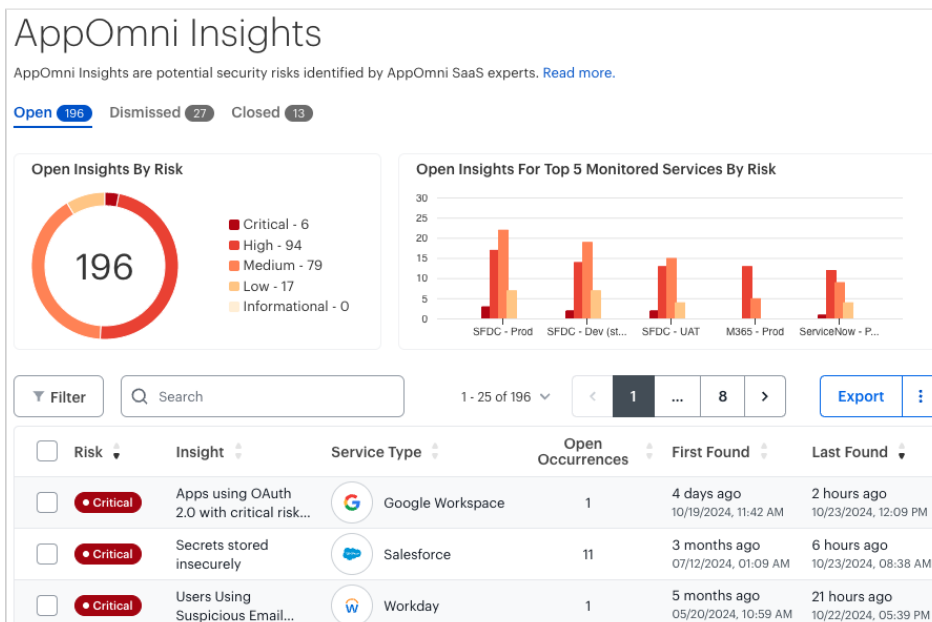

## Growing SaaS Complexity Increases Security Risks

SaaS applications are essential for modern businesses but also introduce security challenges. Each app—whether Salesforce, Microsoft 365, or ServiceNow—has unique configurations, permissions, and integration points. This complexity exposes businesses to risks like misconfigurations, data leaks, and unmonitored third-party access.

Strong security controls, detection, and authentication are vital to protect critical data.

## Gain Control, Reduce Risk, and Simplify SaaS Security

AppOmni provides a powerful platform that brings **visibility, control, and protection** to your SaaS environment. We help security teams manage the growing complexity of SaaS applications by offering **expert insights, monitoring, and automated security checks** to protect your critical business data

## AppOmni at a Glance

### Gain Complete Visibility

See configurations, permissions, and risks across all your SaaS apps in real time.

### Detect and Respond to Threats

Identify insider and outsider threats, compromised accounts, and unusual user behavior early.

### Secure SaaS Integrations

Protect your ecosystem by managing risky third-party app connections.

### Automate Compliance

Easily generate reports and stay aligned with SOC 2, GDPR, and HIPAA.

### Fast Deployment, Immediate ROI

Get quick integration and start seeing value from day one.

## Real Results, Trusted by Industry Leaders

AppOmni's platform is trusted by some of the world's most forward-thinking organizations to protect their most critical SaaS applications

Security teams and owners can quickly detect and mitigate threats using unmatched depth of protection, continuous monitoring, and comprehensive visibility. Trusted by the world's largest enterprises, AppOmni specializes in securing diverse SaaS environments. © 2025 All Rights Reserved. Learn more at [appomni.com](https://appomni.com).

“With AppOmni, we’re able to do in a couple of days what used to take us a month. It has drastically sped up our implementation timelines while adding a higher level of security to our clients’ implementations.

**Senior Managing Director  
& Global Security Lead,  
Accenture**

“We’ve seen a reduction in the number of misconfigurations across our SaaS platforms thanks to AppOmni’s risk reporting and configuration management. AppOmni has allowed us to be more proactive in addressing security challenges.

**Information Security Director,  
DLA Piper**

“Shortly after onboarding, our platform lit up like a Christmas tree. Our SOC and incident response teams activated, receiving alerts directly from AppOmni—before any notification from ServiceNow. This visibility allowed us to triage, assess impact, and minimize risk immediately.

**CISO and  
Associate Vice President,  
University of Cincinnati**
