

Safeguard Financial Data, Reduce SaaS Exposure, Detect Threats

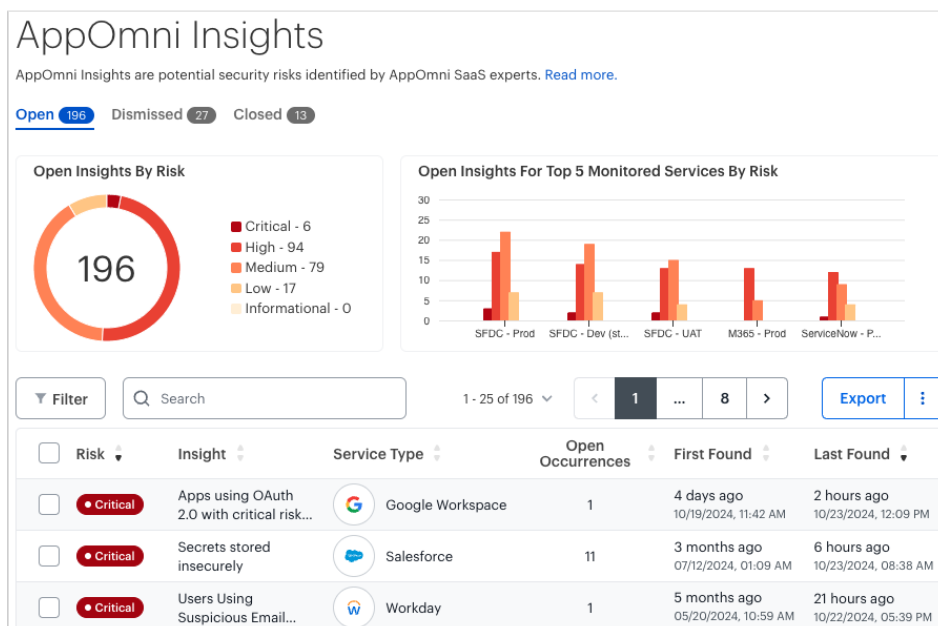

The Challenge: Growing SaaS Complexity Increases Financial Security Risks

SaaS applications are vital for financial institutions but introduce unique security challenges. Each app, like Salesforce, Microsoft 365, or ServiceNow, has specific configurations, permissions, and integrations, creating risks such as misconfigurations, data leaks, and unmonitored third-party access.

Strong security controls, detection, and authentication are essential to safeguard critical financial data and ensure regulatory compliance.

Gain Control, Reduce Risk, and Simplify SaaS Security

AppOmni provides financial institutions with a single solution to **monitor, control, and secure their SaaS apps**. With **expert-backed insights and automated security checks**, it ensures **data protection and regulatory compliance** across SaaS environments.

Gain a clear, prioritized view of critical security risks—backed by security experts—highlighting misconfigurations, suspicious activity, and policy violations to help your team focus on what matters most.

AppOmni at a Glance

Comprehensive Visibility

Identify misconfigurations, risky third-party apps, and access issues to protect client data.

Detect and Respond to Threats

Spot insider and outsider threats and compromised accounts before data is at risk.

Secure Third-Party Connections

Monitor and manage SaaS integrations to reduce third-party risks.

Streamlined Compliance

Generate reports for SOC 2, PCI-DSS, and GDPR to simplify audits.

Quick Integrations

Seamlessly deploy with existing security tools for fast, immediate protection.

Real Results, Trusted by Financial Industry Leaders

AppOmni's platform is trusted by some of the world's most forward-thinking organizations to protect their most critical SaaS applications.

Trusted by the world's largest enterprises, AppOmni specializes in securing diverse SaaS environments. Learn more at appomni.com/industry-solutions/financial-services © 2025 All Rights Reserved

“Our CMO inadvertently shared a Box link publicly on a Friday night. I got an AppOmni alert and was able to fix the issue quickly. I would have never known that this happened without AppOmni.

Anonymous CISO,
Financial Services Company

“The ability to eliminate visibility gaps, improve secure configurations, and continuously monitor has been a game-changer. AppOmni allows us to understand, improve, and monitor the overall security and risk posture of our key SaaS applications, reducing the overall risk to the company.

CISO, Sprinklr

“With AppOmni, we're able to do in a couple of days what used to take us a month. It has drastically sped up our implementation timelines while adding a higher level of security to our clients' implementations.

Senior Managing Director & Global Security Lead,
Accenture
