AppOmni Support

AppOmni Guard: Expert-Led Support For SaaS and AI Security

SaaS security is complex. Ownership is decentralized, responsibilities are unclear, and visibility across multiple applications is a challenge. AppOmni Guard is premium expert support designed to reduce these challenges and help you achieve and maintain peak SaaS and AI security with AppOmni.

With deep expertise, AI-assisted insights, and continuous vigilance, AppOmni Guard accelerates onboarding, strengthens security posture, and streamlines remediation, ensuring faster operationalization of the AppOmni platform. Operating exclusively within AppOmni, our experts provide hands-on guidance and take direct action inside the platform while enabling your internal and GSI teams to confidently manage remediation and governance within your SaaS applications.

Our services provides hands-on support to optimize SaaS security strategy, continuous monitoring, and custom integrations with three different options:

- **Ready** – Build a strong SaaS security program with the right processes
- **Monitor** – Embeds an expert to manage alerts, prioritize security risks, and guide remediation
- **Grow** - Monitor + integrating additional SaaS applications and customization

	Ready *Build a strong SaaS foundation*	**Monitor** *Expert-led security management*	**Grow** *Expand SaaS security coverage*
Outcomes	• Ensures smooth & effective SaaS security rollout • Accelerates deployment & SaaS security knowledge	• Reduce operational burden with expert support • Address security issues faster • Enhance response and remediation efficiency • Improves focus on critical risks through intelligent prioritization	• Maximizes AppOmni's impact across your SaaS ecosystem • Ensures integrations align with business and compliance goals
Service Description	• An AppOmni expert assists your team to create a structured SaaS security strategy • Provides staffing and operational best practices	Ready and: • Embeds an AppOmni expert to triage alerts and prioritize risks • Provides clear guidance for customer-led remediation	Monitor and: • Builds custom integrations for SaaS apps not covered out-of-the-box • Expands security coverage to high-priority apps • Tunes and customizes platform to security and compliance needs

How AppOmni Powers Secure SaaS and AI-Enabled Applications

Our platform architecture provides the foundation for SaaS visibility, control, and security. Here's how AppOmni integrates into your operations to protect critical data.

> With AppOmni, we're able to do in a couple of days what used to take us a month. It has drastically sped up our implementation timelines while adding a higher level of security to our clients' implementations."

Senior Managing Director & Global Security Lead, Accenture

> AppOmni will help you solve the risks you never knew about that could result in a breach or data exposure. The AppOmni platform solves this in a painless, efficient, and programmatic lifecycle way."
